Community manager and Discord/X builder for AI and Web3 projects — four years setting up servers from scratch, cleaning up neglected ones, and growing them into active communities. Most recently took a 2,000-member Discord to **7,500+ members** and lifted weekly message volume from ~1,000 to **23,000+**. Comfortable owning server architecture, moderation, engagement programming, weekly health reporting, and the technical writing that goes with it.
